PAYROLL TEST PLAN

1. INTRODUCTION

This Test Plan describes the testing strategy for the **Payroll Management System** used in organization.The purpose of this document is to outline the testing objectives, scope, approach, responsibilities, risks, and schedule to ensure the payroll system functions accurately, securely, and in compliance with organizational and statutory requirements.

2. TEST OBJECTIVES

- **Objective 1:** Ensure salary calculations (earnings, deductions, net pay) are accurate for all employee types.
- **Objective 2:** Verify compliance with statutory components (PF, ESI, TDS, Gratuity, Professional Tax).
- **Objective 3:** Validate payroll reports, tax slips, and pay slips generation.
- **Objective 4:** Confirm data security, role access, and audit log features.
- **Objective 5:** Ensure integrations (HRMS, attendance, finance) work correctly.

3. TESTING SCOPE

In-Scope

- Employee master data
- Attendance and leave integration
- Monthly salary processing
- Arrears calculation
- Bonus & incentive calculations
- Tax calculations (TDS)
- Payroll reports (payslips, YTD reports)
- Bank file generation for salary disbursement
- Access control & role permissions
- Exception handling (LOP, overtime, reversals)

Out-of-Scope

- Third-party vendor payroll systems
- Non-payroll HR processes (performance management, L&D)

PAYROLL TEST STRATAGEY FOR - EY GDS

1. INTRODUCTION

This Test Strategy defines the overall testing framework, principles, and governance for validating the Payroll Management System at EY GDS.
It outlines how testing will be performed, what methods will be used, and who will participate in each phase to ensure consistent, predictable, and high-quality delivery.

2. BUSINESS BACKGROUND

Payroll is a critical monthly operation for EY GDS, covering employee salary processing, statutory compliance, and financial reporting.
The testing strategy ensures that payroll runs seamlessly across different business units, employment types, pay structures, and statutory requirements.

3. TESTING GOALS & OBJECTIVES

- To ensure the payroll process is accurate, compliant, and stable across all cycles.
- To validate end-to-end payroll calculations with realistic test data.
- To ensure interfaces (HRMS, attendance, finance, statutory portals) work consistently.
- To confirm that payroll can handle high volumes, multiple pay groups, and exception scenarios.
- To verify that payroll operations meet EY GDS security, audit, and confidentiality standards.

4. SCOPE OF TESTING

In-Scope

- Salary configuration, structures, and pay groups
- Integration with employee data, attendance, and HRMS
- Statutory rule engines (PF, ESI, PT, TDS, LWF)
- Payroll run, re-run, and off-cycle adjustments
- Payslip and payroll report generation
- Year-end processes (Form 16, YTD reports)
- Bank file/NEFT file generation

Out-of-Scope

- Recruitment modules
- Performance management systems
- Third-party vendor payroll systems not used by EY GDS
